Photograph the life around the work.

Warm light. Honest materials. People absorbed in making something. A visual journey from the room to the piece, and into the process behind it.

Illustrative imagery — awaiting partner photography.

Visual direction only. This scene does not establish a real product, project or maker partnership.

16
photographs, prioritized

2
proposed sessions

4
optional motion clips

First priority: rooms, materials and real making. Founder portraits can follow.

Shoot coordination: Kody Kochaver / hello@patina.cloud

The essential first frames.

P1 = first delivery. P2 = next layer. P3 = later, if useful. The full checklist includes setup notes and blank fields for on-set tracking.

S01
P1

A room that feels lived in

Place the selected piece on the right; leave the left third quiet for the headline. Keep verticals straight and the room believable.

16:9 landscape; uncropped master | Homepage opening; press; campaign lead

S02
P1

The room, in portrait

Recompose from camera for a tall frame. Keep the entire hero piece readable; leave breathing room above and below.

4:5 and separate 9:16 | Mobile hero; social; story covers

S03
P1

The same piece, considered

Photograph the S01 piece at the same three-quarter angle and camera height. Show the full silhouette and every foot, with separation from the background.

Landscape plus portrait; cutout source | Room-to-study transition

S04
P1

A detail with something to say

Choose a joint, edge, seam or material meeting on the S01 piece. Make the construction legible; capture a wider companion for context.

Close landscape and 4:5 | Piece study; maker editorial

S05
P1

A real material conversation

Photograph samples Leah is actually considering: one overhead still arrangement, one frame with a hand making a choice.

Landscape, square-safe and 4:5 | Our Story; material study; founder letters

S06
P1

The transition plates

Before moving the camera, capture the S01 setup with and without the piece. Include a neutral, uncluttered background frame for the study.

Full-resolution landscape masters | Motion compositing; responsive crops

Let the process show.

Connect room, piece and workshop only when they share a documented story. Otherwise present the workshop as its own maker study.

S07
P1

The workshop in context

Show where real work happens. Include the maker, bench and a readable piece or component. Let the maker continue their normal process.

Landscape and 4:5 | Making scene; maker page; editorial

S08
P1

Hands doing the work

Capture one real operation: fitting a joint, shaping an edge or applying finish. Shoot a close view and a wider frame showing the action.

Landscape, 4:5 and vertical option | Homepage making; maker invitation; social

S09
P2

A finish or material decision

Show the actual test, offcut or finish comparison beside the piece. Make the difference visible through light and angle.

Close landscape and square-safe | Journal; process notes; maker stories

S10
P2

Leah, in the process

Over the shoulder or hands selecting materials; include one wider frame of a real design conversation. Keep attention on her judgment.

Landscape and 4:5 | Our Story; designer outreach

S11
P2

Kody, building Patina

Hands sketching a flow or an over-the-shoulder view of the actual prototype. Let a real working gesture carry the frame.

Landscape and 4:5 | Our Story; building updates

S12
P2

Kody and Leah, together

Photograph an unforced conversation around materials or the prototype. Capture listening and exchange before asking for eye contact.

Landscape and 4:5 | Our Story; founder letters; selected press

A little more of the studio.

S13
P2

The maker at their bench

Start with a working portrait and, if comfortable, one direct glance to camera. Give tools and work enough context to mean something.

4:5 and landscape | Future maker profiles; editorial

S14
P2

Evidence of a life

A used chair arm, book, mended textile or personal object in its actual setting. Choose something with a short, true story.

Landscape and square-safe | Page transitions; letters; campaign details

S15
P3

A simple founder portrait

One relaxed portrait together; individual frames only if time allows. Soft daylight, own clothes, no staged executive pose.

4:5, with room for square crop | Later press and founder profiles

S16
P2

Room to place an invitation

A quiet patch of room, wall, work surface or fabric with directional light. Leave a clean area for campaign copy.

16:9, 4:5 and 9:16 | Founding Circle CTA; campaign backgrounds

Optional motion capture

Quote separately from stills. Four short, silent clips are enough to extend the story; the website will choreograph transitions.

M01	Room light. 8-10 seconds; locked frame; a small natural movement in the room.
M02	A material choice. 8-10 seconds; one hand places or turns a real sample, then leaves the frame.
M03	A making gesture. 8-10 seconds; one repeatable, safe action chosen by the maker.
M04	A working exchange. 8-10 seconds; Kody and Leah look at a material or prototype together.

Build around the light.

Proposed scope for a quote, not a booked schedule. Leah leads styling and materials; Kody handles prototype readiness and final delivery coordination.

Session A / Home or studio / 4 hours

00:00-00:25	Light check, styling and marked camera positions.
00:25-01:35	S01-S03 + S06: room, portrait, piece and clean plates.
01:35-02:10	S04-S05: piece detail and material conversation.
02:10-03:00	S10-S12: Leah, Kody and a working conversation.
03:00-03:30	S14 + S16; S15 only if the essentials are complete.
03:30-04:00	Review, missed crops and backup. Clips only within agreed scope.

Session B / Maker workshop / 90 minutes

00:00-00:15	Walk the shop; identify the real operation and story.
00:15-01:00	S07-S08 first; then S09 + S13 if work allows.
01:00-01:30	Optional M03, captions, missed details and backup.

Before the photographer arrives

Choose the room, hero piece and best daylight window together. Confirm access, available people and workshop timing. Collect real samples, a working sketch and object credits. Clear the prototype screen. Agree the shot priorities, usage, delivery date, retouching and whether motion or cutout work is included.

Travel between locations is additional. A workshop session can follow after launch.

Make every frame useful.

Light & finish

Warmth should come from the light and materials. Keep whites neutral, timber believable and shadow detail present. Retouch distractions with care; retain grain, wear and signs of use. No text or brand marks baked into photographs.

Continuity & cropping

For S01, S03 and S06, record lens, camera height, exposure and piece position. Review a rough room-to-piece alignment before moving anything. Compose landscape and portrait separately; preserve the full silhouette and generous edges.

Stills delivery

Proposed quote target: 20-24 edited full-resolution selects covering the priority shots; final count agreed with photographer. Deliver sRGB JPEG masters, preferably 5,000+ pixels on the long edge when source capture allows. Supply 16:9, 4:5 and 9:16 crops for S01-S03/S16 where composed.

Motion & cutout options

If commissioned: 4K clips where available, a consistent 24 or 30 fps, no titles or baked-in music, plus camera originals. For S03, include a transparent PNG cutout only if extraction is in scope; otherwise supply the clean, full-resolution source and shadow plate.

Captions, credit & usage

For every select, record photographer, date, location, people, actual piece/maker, materials and a confirmed detail. Agree website, organic social, email and press use; specify paid use separately if planned. Record credits and any agreed restrictions alongside filenames.

Delivery folder: 01_Masters / 02_Web_Crops / 03_Motion / 04_Captions

Filename example: patina_S01_room-wide_01.jpg. Use the companion CSV to map files to shots, captions, credits and usage. The existing illustrative images can remain clearly labeled while real photographs arrive.
